# SWAN PYAE AUNG

Bangkok, Thailand · Open to Remote / Relocation | +66 65-085-8694 | swanpyaeaung.dev@gmail.com | LinkedIn | GitHub | Website

## EDUCATION

**Rangsit University** December 2022 – December 2025

*B.Sc. Information and Communication Technology · First-Class Honours · GPA: 3.98 / 4.00*

**Certification:** Introduction to Scrum Master Training, LearnQuest (Coursera)

**Relevant Coursework:** Data Structures, Object-Oriented Programming, Database Systems, Software Engineering, Full-Stack Development

## EXPERIENCE

**FPT Software · Client Project: NXP Semiconductors** July – October 2025

*Software Engineer Intern · Remote*

- Participated in daily sprint meetings and coordinated defect communication between developers and QA across the release cycle, documenting root causes and reproduction steps to support developer investigation.
- Engineered Java-based automated testing solutions for an enterprise semiconductor client, improving regression reliability and accelerating validation cycles across multiple product releases.
- Supported release delivery by building a Docker, Jenkins, and Nexus CI/CD pipeline and enforcing Git workflow standards (pull request reviews, branch validation, merge checks) across release cycles.

**Information Technology Seminar Program · Rangsit University** January – July 2025

*President & Organizing Lead*

- Led end-to-end planning and execution of a university technology seminar, delegating work across a 20-member cross-functional team and achieving 100% task completion before event launch.
- Managed full event logistics including scheduling, milestone tracking, and task reporting, ensuring all deadlines were met and accountability was maintained throughout the event lifecycle.
- Coordinated closely with academic advisors and stakeholders on proposal development and call-for-papers management, serving as the central communication bridge between organizers and participants.

## PROJECTS

**AI-Powered Job Board (Live)** — React, Next.js, TypeScript, Node.js, Express, PostgreSQL December 2025 – March 2026

- Independently managed a full-stack project from build through deployment, debugging, and issue resolution, delivering authentication, job posting, and application workflows.
- Built REST APIs in Node.js and Express and validated them with Postman test collections covering authentication, permissions, and error handling.
- Containerized the application with Docker and optimized PostgreSQL queries and server-side rendering to improve scalability under dynamic workloads.

**Hotel Self Check-In System (Case Study)** — Flutter, Dart, Android Studio, Figma January – September 2024

- Mapped a manual hotel reception workflow and re-engineered it into a structured self-service system within a cross-functional team of 4 across design, development, and delivery.
- Gathered structured feedback from 30+ users through hands-on usability testing, translating findings into workflow fixes that reduced input errors by 75%.
- Presented workflow improvements and usability recommendations based on structured user testing and operational feedback, delivering under tight deadlines.

**University Pickup FAQ System** — HTML, CSS, JavaScript, Gemini API August 2023 – January 2024

- Built a multilingual AI-powered FAQ chatbot with the Gemini API to streamline repetitive support requests, validating input and output payloads to prevent malformed requests.
- Improved response performance by increasing API token limits from 1,000 to 4,000 and validating latency reductions through testing.
- Followed SDLC guidelines through development, testing, and multi-round usability assessments with 10+ users, presenting structured recommendations to faculty stakeholders across multiple review sessions.

## TECHNICAL SKILLS

**Delivery:** Agile/Scrum, SDLC, milestone tracking, task reporting, QA and release coordination, defect tracking, stakeholder communication

**Tools:** Jira, Notion, Google Workspace, Figma, GitHub, GitLab

**Technical:** Git, CI/CD (Jenkins, Docker), REST APIs, PostgreSQL/SQL, Postman, TypeScript, Python, Java
