

SWAN PYAE AUNG

Bangkok, Thailand — Open to Remote / Relocation

+66 65-085-8694 — swanpyaex03@gmail.com — LinkedIn — GitHub — Portfolio Website

PROFESSIONAL SUMMARY

Frontend developer with hands-on experience building production React/Next.js applications and mobile UIs in Flutter. Comfortable working across the full stack with TypeScript, REST APIs, and PostgreSQL. Quick to pick up new tools and technologies, with real-world Agile experience collaborating across cross-functional teams.

EDUCATION

Rangsit University

B.Sc. Information and Communication Technology (First-Class Honours)

Dec. 2022 – Dec 2025

Bangkok, Thailand

RELEVANT COURSEWORK

Data Structures, Database Systems, Object-Oriented Programming, Full-Stack Development

EXPERIENCE

FPT Software (Client Project: NXP Semiconductors)

July 2025 – October 2025

Software Engineer Intern

Remote

- Maintained Jenkins-based CI/CD pipelines for containerized builds using Docker, supporting automated testing and integration workflows.
- Investigated build failures and runtime defects through log analysis and containerized test environments, improving deployment stability across development branches.
- Collaborated with embedded, QA, and front-end teams during 2-week Agile sprints to track integration risks and support structured release cycles.
- Managed Git-based workflows including pull requests, branch validation, and merge checks to ensure consistent build automation and reduce regression risks.

PROJECTS

AI Powered Job Board (Live) — *React, Next.js, TypeScript, Node.js, Express, PostgreSQL, REST API*

August 2025

- Build a full-stack job marketplace with role-based access, dynamic job listing pages, and employer dashboard — fully responsive to desktop and mobile viewports.
- Designed reusable React component library with TypeScript interfaces, supporting consistent user interface patterns in authentication flows, job cards, and pagination.
- Integrated 15+ REST API endpoints with client-side data fetching, loading states, and error boundaries for a seamless user experience.
- Containerized and deployed with Docker using environment-based configuration; implemented indexed PostgreSQL queries for efficient data retrieval.

Hotel Self Check-In System (ERP Workflow Hackathon – CiMSO ERP) — *Flutter, Android Studio*

September 2024

- Designed and implemented 10+ mobile UI screens with intuitive navigation flows and interactive form components in Flutter.
- Reduced user input errors by 75% by redesigning client-side validation logic with real-time field-level feedback.
- Conducted iterative user testing with 30+ trial users, directly translating feedback into UI/UX improvements that enhanced usability and reliability.
- Structured modular, reusable front-end components using object-oriented principles for long-term maintainability.

University Pickup FAQ System — *HTML, CSS, JavaScript, Gemini API*

January 2024

- Integrated external APIs and implemented structured response validation to ensure consistent data formatting.
- Implemented robust error handling for timeouts, malformed responses, and upstream service failures.
- Managed asynchronous HTTP request lifecycles to prevent UI blocking and ensure stable client-server interaction.
- Validated input/output payloads to prevent malformed request propagation and maintain system reliability.

TECHNICAL SKILLS

- **Front-end:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **UI Development:** Responsive Design, Form Validation, Component-Based Architecture, Client-Side State Management
- **Databases:** PostgreSQL, Prisma ORM
- **DevOps & Cloud:** Docker, Jenkins, CI/CD Pipelines, Nexus, AWS (S3)
- **Testing & QA:** Playwright (E2E Testing), Unit Testing, CI Validation, Integration Testing
- **Version Control:** Git, GitHub, GitLab
